Website Current Status Report

Date: November 12, 2025
Status: ⚠️ **ARCHITECTURE MISMATCH - Migration Completed But Rules Not Updated**

🚨 CRITICAL DISCREPANCY

Rules Say (`.cursorrules` - Updated November 12, 2025):

```
rensto.com → Vercel (Next.js app – main site, marketplace, subscriptions, all public pages)
```

Reality (DNS + HTTP Headers):

```
rensto.com → Vercel (Next.js app) ✅ ACTUALLY LIVE
```

Status: ✅ **CONSISTENT** - Rules and reality match (migration completed November 2, 2025, rules updated November 12, 2025).

✅ ACTUAL CURRENT STATE

DNS Configuration (Live):

- ✅ `rensto.com` → Vercel (`cname.vercel-dns.com`)
- ✅ `www.rensto.com` → Vercel (`cname.vercel-dns.com`)
- ✅ `admin.rensto.com` → Vercel (`rensto-admin` project)
- ✅ `api.rensto.com` → Vercel (`api-rensto-site` project)

🎨 Design System Status (November 14, 2025):

- ✅ **Brand Colors**: Correctly implemented (#fe3d51, #1eaef7, #bf5700, #5ffbfd)
- ✅ **Typography**: Outfit font (replaced Inter)
- ✅ **Theme**: Dark theme (#110d28 background)
- ✅ **Logo**: Implemented on all service pages
- ✅ **Headers**: Standardized (no duplicates)
- ✅ **Navigation**: Consistent across all pages

HTTP Headers Confirmation:

```
server: Vercel
x-vercel-cache: HIT
x-vercel-id: cle1::hnsgv-1762911040481-d237ad9c8b0e
```

Conclusion: Site is **100% on Vercel**, not Webflow.

📊 Vercel Projects Status

Project	Domain	Source	Status	Purpose
rensto-site	`rensto.com`, `www.rensto.com`	`apps/web/rensto-site/`	✅ **ACTIVE**	Main site + APIs
api-rensto-site	`api.rensto.com`	`apps/web/rensto-site/`	✅ Active	API endpoints (redundant?)

rensto-admin	`admin.rensto.com`	`apps/web/admin-dashboard/`	✅ Active	Admin dashboard
rensto-webflow-scripts	(CDN only)	Separate repo	✅ Active	Checkout scripts CDN
rensto-tax4us-portal	`tax4us.rensto.com`	Customer project	✅ Active	Customer portal

---

🏗️ Current Architecture

Main Site (`rensto.com`):

- **Hosting**: Vercel (Next.js)
- **Source**: `apps/web/rensto-site/`
- **Pages**: Homepage, Marketplace, Subscriptions, Custom Solutions, etc.
- **APIs**: `/api/stripe/checkout` , `/api/marketplace/workflows` , etc.

API Endpoints:

- **Available at**: `rensto.com/api/*` AND `api.rensto.com/api/*`
- **Source**: Same (`apps/web/rensto-site/src/app/api/`)
- **Status**: Both work (redundant but functional)

Stripe Integration:

- **Checkout**: `rensto.com/api/stripe/checkout` ✅
- **Webhook**: `rensto.com/api/stripe/webhook` ✅
- **Status**: Integrated and working

📋 What Exists in Codebase

Next.js App (`apps/web/rensto-site/`):

- ✅ **Pages**: Homepage, Marketplace, Subscriptions, Custom, Solutions, etc.
- ✅ **Components**: 85+ React components
- ✅ **API Routes**: Stripe, Marketplace, etc. (Webflow API routes removed - site on Vercel)
- ✅ **Styling**: Tailwind CSS + Shadcn UI
- ✅ **Deployment**: Vercel (auto-deploy on git push)

Webflow Scripts (Separate Repo):

- **Repo**: `rensto-webflow-scripts` (separate GitHub repo)
- **CDN**: `rensto-webflow-scripts.vercel.app`
- **Purpose**: Serves checkout scripts for Webflow pages
- **Status**: ⚠️ **Still referenced but Webflow not active**

✅ Issues Resolved

1. Rules vs Reality ✅ FIXED (Nov 12, 2025)

- **Rules say**: Vercel for main site ✅ (Updated Nov 12, 2025)
- **Reality**: Vercel for main site ✅
- **Status**: ✅ **CONSISTENT** - Rules and reality now match

2. Webflow Scripts CDN ⚠️ REVIEW NEEDED

- **CDN scripts**: Still deployed and active (`rensto-webflow-scripts.vercel.app`)

- **Purpose**: Was for Webflow pages (now archived)
- **Status**: ⚠️ May not be needed - verify if any pages still use these scripts
- **Note**: Webflow is archived, but scripts CDN still exists (may be used by other systems)

3. Redundant API Projects

- `rensto-site` : Has APIs at `rensto.com/api/*`
- `api-rensto-site` : Has APIs at `api.rensto.com/api/*`
- **Both**: Serve from same source code
- **Question**: Do we need both?

🎯 What Needs to Be Decided

Option 1: Keep Current State (Vercel)

- ✅ Update rules to reflect reality
- ✅ Remove Webflow references
- ✅ Consolidate API projects (optional)
- ✅ Document Vercel architecture

Option 2: Rollback to Webflow

- ⚠️ Revert DNS to Webflow
- ⚠️ Keep Vercel for APIs only
- ⚠️ Update codebase accordingly

Option 3: Hybrid Approach

- ⚠️ Some pages on Webflow, some on Vercel
- ⚠️ More complex architecture
- ⚠️ Requires careful DNS management

📊 Migration History

November 2, 2025:

- ✅ DNS migrated: Webflow → Vercel
- ✅ Zero downtime migration
- ✅ SSL certificates auto-provisioned
- ✅ Environment variables configured
- ✅ Site verified loading from Vercel

Post-Migration:

- ✅ Site functional on Vercel
- ✅ APIs working
- ✅ Stripe integration working
- ✅ Rules documentation updated (Nov 12, 2025)

✅ Current Status Summary

- **Main Site**: ✅ Vercel (Next.js) - Live and working
- **APIs**: ✅ Vercel - Working at both domains (`rensto.com/api/*` and `api.rensto.com/api/*`)
- **Admin**: ✅ Vercel - Working
- **Webflow**: ⚠️ Exists but archived/inactive (DNS doesn't point to it)
- **Documentation**: ✅ Updated (Nov 12-16, 2025) - Rules and reality match

---

Status: ✅ **ARCHITECTURE CONSISTENT** - All documentation updated to reflect Vercel architecture
